

Compatible Bowl Manufacturers

September 2010

For every style, there's a Geberit carrier

The Geberit carrier makes dramatic design concepts a reality by taking the toilet off the floor. The Geberit carrier makes it possible to position components in any part of the bathroom, while concealing the functional components. The system's flexibility and adaptability are fully realized when you add a compatible toilet fixture.

With Geberit, designers can now create the most compelling, original bathroom designs by using one of the increasing number of toilet bowls compatible with the Geberit carrier, including over 25 HET water-saving toilets.

Just a few of the latest compatible bowl manufacturers and models for the 111.335, 111.255 and 111.728 Geberit carriers are listed on the right.

 Listed by I.A.P.M.O.
